# May 21-23, 2009, PAEPI National Symposium and Planning, hosted by MAAP, Bataan

## MAAP hosts symposium for 'Extensionists'

The Maritime Academy of Asia and the Pacific (MAAP) in coordination with The Philippine Association of Extension Program Implementers (PAEPI) Inc., and the National Federation of Center for Human Rights Education (NCFHRE), has organized and hosted a national consultative forum cum seminar-workshop on extension program enhancement and resource generation with a theme "Towards Relevant and Responsive Implementation of Extension Service Programs to Empower Communities for Sustainable Development" in its premises at the Kamaya Point in Mariveles, Bataan on May 21 to 23, 2009.

BY JUN G. GARCIA

The goal of PAEPI is to empower people for sustainable development. Its mission is to bring extension to the level of discipline and as a profession. It aims to elevate extension service to a level of discipline vital to effective individual and social transformation and to build and upgrade the capabilities and professionalization of extension program implementers.

Among the programs and projects of PAEPI include capability building in extension, research, consultation, special projects, publications, international linkages. Its approaches and strategies include

the Commission on Higher Education Regional Office III headed the new set of officers of PAEPI and NCFHRE, who seek their votes before him.

In his speech, he commended the PAEPI for its growing membership and hope that it can "achieve a great symphony like as others."

"I am a witness to the growth of this association from the time it was established and nurtured to become what it is now in Region III," he said proudly.

According to the CHEDRO director, the objective of the national forum is to

network, identify and delineate, training and bridging, resource generation, participatory planning and consultation, values orientation, media advocacy, and social mobilization, among others.

According to MAAP president, Vice Admiral Eduardo Als R. Santos, having an extension service in the academy is like "helping the community around them." It is similar to what is commonly known as Corporate Social Responsibility or CSR.

"What they are doing is relative to CSR. It is a bid or trend. In MAAP, it is a way of life," he said. "We help the community build a church. The people in the churches are being taught English and computer literacy. We have a living program near the elementary school," the president noted.

"To achieve this noble objective is to give hope (Thomas Edison discovered the proper materials for filament in the light bulb. Edison performed nearly 1,000 experiments. He would not quit. He was committed, my dear extensionists. Commitment is the key that unlocks the door to success. Without the key, the door will never open," he further said.

He stressed that the "level of determination to accomplish work is measured by what it takes to make one quit. He noted that any reservation in mind concerning the objectives of plan will become road blocks to successful implementation."

"Every great endeavor has a price tag. The greater the job, the higher the price; the price tag is known as commitment," concluded Dr. Francisco.

**End Poverty by 2015**  
Dr. Dolores Marie P. Serrano, National MDG Campaign and Advocacy Specialist of the United Nations Millennium Initiative Co-ordinators Office, explained that the MDG is to "end poverty by 2015."

According to her, all 185 UN member states have pledged to uphold eight (8) millennium goals. First and foremost is to

improve extension services with UN efforts of CHED, the Commission on Human Rights, the Philippine Association of Maritime Institutions, among others with implications on education for sustainable development and the Philippine Sustainable Development Goals or MDG.

"Extension is one of the critical functions in education. It is important that the action plan you will formulate and implement must achieve one important milestone and that is the higher education institutions (public or private) is ranked by its local instantly as a provider of extension programs and services that are responsive to the needs of the community for people empowerment and self reliance," said Dr. Francisco.

"To achieve this noble objective is to give hope (Thomas Edison discovered the proper materials for filament in the light bulb. Edison performed nearly 1,000 experiments. He would not quit. He was committed, my dear extensionists. Commitment is the key that unlocks the door to success. Without the key, the door will never open," he further said.

He stressed that the "level of determination to accomplish work is measured by what it takes to make one quit. He noted that any reservation in mind concerning the objectives of plan will become road blocks to successful implementation."

"Every great endeavor has a price tag. The greater the job, the higher the price; the price tag is known as commitment," concluded Dr. Francisco.

**End Poverty by 2015**  
Dr. Dolores Marie P. Serrano, National MDG Campaign and Advocacy Specialist of the United Nations Millennium Initiative Co-ordinators Office, explained that the MDG is to "end poverty by 2015."

According to her, all 185 UN member states have pledged to uphold eight (8) millennium goals. First and foremost is to

eradicate extreme poverty and hunger by 2015. It aims to reduce by half the proportion of people living on less than a dollar a day. It aims to reduce by half the proportion of people who suffer from hunger.

Second is to achieve universal primary education. It aims to ensure that all boys and girls complete a full course of primary schooling. Next is to promote gender equality and empower women. This is to eliminate gender disparity in primary and secondary education preferably by 2005 and at all levels by 2013.

Fourth is to reduce child mortality by two thirds the mortality rate among children under five. Next is to improve maternal health by reducing to three quarters the maternal mortality ratio and to have universal access to reproductive health.

The sixth MDG is to combat HIV/AIDS, malaria and other diseases. It aims to put a stop and begin to reverse the spread of the dreaded disease and likewise to both end and begin to reverse the incidence of malaria and other major diseases.

The next one is to ensure environmental sustainability. This is integrating the principles of sustainable development into country policies and programs and to ensure that environmental resources. It also aims to reduce by half the proportion of people without sustainable access to safe drinking water and to achieve significant improvement in the lives of at least 100 million slum-dwellers by 2020.

The community will be the catalyst of change.

Dr. Nohel R. Emano, Silmar University

Lastly, develop a global partnership for development. This is geared at developing further an open trading and financial system that is rule-based, predictable and non-discriminatory. It includes a commitment to good governance, development and poverty reduction - nationally and internationally.

It also aims to address the special needs of the least developed countries and of the landlocked and small island developing states. It aims to help deal comprehensively the debt problems of developing countries.

It also aims to develop decent and productive work for the youth, provide access to affordable essential drugs, and to make available the benefits of new technologies.

**Aug 6-9 2009 UNAP Special Citation for MAAP producing exemplary students and youth leaders (University of Makati , PAEPI as one of the partner organizations with 5 PAEPI BODS : Dr. Rowena Nieveras of R-9, Dr. Elizabeth Josen of R-3, Dr Ortega of R-6, & Dr. Dugang of NCR)**

## NEWSBITS

### MAAP wins best in physical facilities

The Maritime Academy of Asia and the Pacific (MAAP) was proclaimed the best in physical facilities nationwide as part of the Best Student Services Program conducted by the Commission on Higher Education (CHED) during the National Awarding Ceremony at the University of the Philippines – Diliman, Quezon City last April 17, 2009.

MAAP, which is the only maritime academy among the 14 national finalists, represented Region III after winning the Regional Best Student Services Program including the Best in Development and Welfare and Best in Community and Research Development Program.

MAAP was given a plaque of appreciation and a cash prize of Php 25,000, which was received by Dr. Angelica M Baylon, MAAP in charge of Research and Extension Services, who represented the Academy in the event.

### Dionisio undergoes training

NEW DELHI, INDIA – Due to the inadequacies of the watchkeeping practice of young deck officers nowadays, deck cadet Marcelino Dionisio attended Bergenese Worldwide-Bridge Team Management and Electronic Chart Data Information System (BW-BTM and ECDIS) Training Course in ARI-Applied Research International B-1, Haus Khas last September 14-19, 2009.

The BW Shipping sponsored training included four PMMA cadets, three Chinese cadets, one Indian cadet, a first assistant engineer and six others.

The 6-day training, which tackled BTM and ECDIS, also focused on the Rules of the Road (ROR) and simulator exercises of the said skills and competencies.
